

# COULD TEACHERS AND TRAINERS CARE FOR LEARNERS' MENTAL HEALTH?

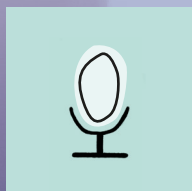

# AHEAD inVET

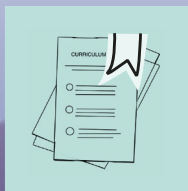

## mentalHEalth AmbassaDors in VET institutions

The epidemic, wars and insecurities pose a great risk to mental health. VET institutions were particularly affected by the restrictions and distance learning. Teachers and trainers have to cope with the personal mental health consequences and also deal with the problems of their learners. VET institutions also have to face the challenges to remain an attractive option and provide the right tools for teachers and trainers.

With organisations from Austria, Italy, Croatia, Greece and Belgium, we are working on the project AHEAD in VET until 2025 to improve the mental health situation in the VET institutional sector and to provide a supportive environment and the right tools for teachers and trainers.
